About Us

Established in 1999, Gamma is a leading edge installer of Communal TV Systems (IRS) and Security Systems. Our Clients consist of Electrical Contractors, Housing Associations, Local Authorities and Property Developers. Our philosophy is to provide quality & leading edge design, installation and after sales maintenance whilst remaining competitive within the market.

Quality

All our staff receive the highest level of training and work to the highest standards. We hold the following accreditations:

Confederation of
Aerial Industries

Sky Digital
Approved

Contractors Health
& Safety Scheme

Constructionline

ISO9001 Quality
Assurance

Electrical Contractors and Us

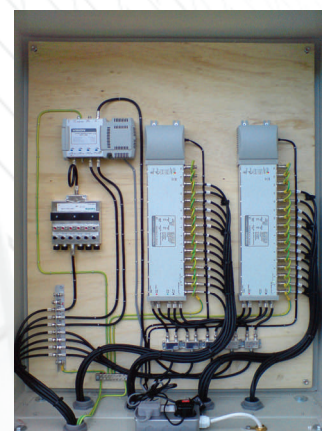

“A perfect working partnership”. We understand the needs of Electrical Contractors. From fast turn-around of quotations to providing schematics for first fix cabling, and from excellent on-site management of installations to prompt returns of testing and O&M manuals; We are well placed to meet your needs!

Communal TV Reception Systems (IRS)

Communal TV Reception Systems provide TV reception to the residents of multi dwellings thus avoiding the requirement for numerous unsightly individual aerials and satellite dishes. Commonly known as Integrated Reception Systems (IRS), they can provide the residents with the facility to receive SkyHD, Sky+, Freesat, Freeview, standard analogue TV, FM & DAB.

The reception of foreign language satellite channels can also be incorporated within an IRS System. We can provide a full design, consultancy and project managed installation to CAI regulations and ISO9001 standards. Gamma has extensive experience within the building industry through close working relationships with its many Electrical Contractor partners.

Door Entry Systems

Door entry systems are an effective way of monitoring and controlling access to a property. Whether the requirement is Video Entry or Audio only, we can provide the most suitable solution to your exacting requirements. Our Door Entry Systems range from small single entrance single block systems, to multi-entrance multi block Concierge Switchboard controlled systems. We can incorporate key fob, swipe card or pin code access control within our Door Entry Systems.

We are proud to represent all major manufacturers of high quality door entry equipment.

Access Control Systems

Access Control Systems provide the means to control and monitor access to residential buildings and commercial premises via key fob, swipe card or pin code to name a few. Access control systems can also be built in to Door Entry Panels. Our systems range from single door access to PC based multi-door systems which not only control access but also log entry and exit times for individual key holders.

CCTV Systems

Our reputation for providing leading edge tailored solutions also extends to CCTV. Our Systems range from residential systems where the CCTV images can be integrated within the IRS System and monitored by the residents' TV's, or by concierge with continuous DVR Recording. Remote monitoring is a perfect solution for buildings without a 24 hr concierge service.

Leasing and Maintenance Solutions

Gamma offer a wide range of bespoke leasing and maintenance solutions. Our agreements are designed around the needs of Developers, Managing Agents, Housing Associations and Local Authorities. Benefits include; No initial capital outlay - Full warranty and free maintenance for the full leasing term - No risk of system obsolescence - No expensive repair and maintenance costs - Tax efficient - Low monthly payments can be added to communal service charges.
